Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Coastal regions will again be subject to fog and areas of drizzle this morning. Interior locations will begin the day generally clear, then cloud over as an upper disturbance transits northwest California. This disturbance will bring a threat of thunderstorms across much of the northwest California interior this afternoon and early evening.

San Francisco Weather:

Midlevel moisture streaming across the region will bring a slight chance of sprinkles today for part of the forecast area. Otherwise, dry conditions and temperatures near or slightly above normal can be expected through the remainder of the week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Moisture surge will bring a few sprinkles and thunderstorms to portions of interior northern California into midweek. The forecast area will have hot afternoon temperatures this week with a Delta Breeze each day bringing decent cooling at night for the valley.

Hanford Weather:

A drier southwest flow will prevail over the forecast area today and Wednesday keeping thunderstorm chances confined to the higher elevations of the southern Sierra Nevada. Temperatures will remain on the hot side through the remainder of the week.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

There will be a slight chance of thunderstorms and showers this evening, and again Wednesday afternoon and evening for Ventura and Los Angeles mountains and deserts in a moist monsoon flow. The temperatures into next week will be above normal with the warmest day this Friday.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

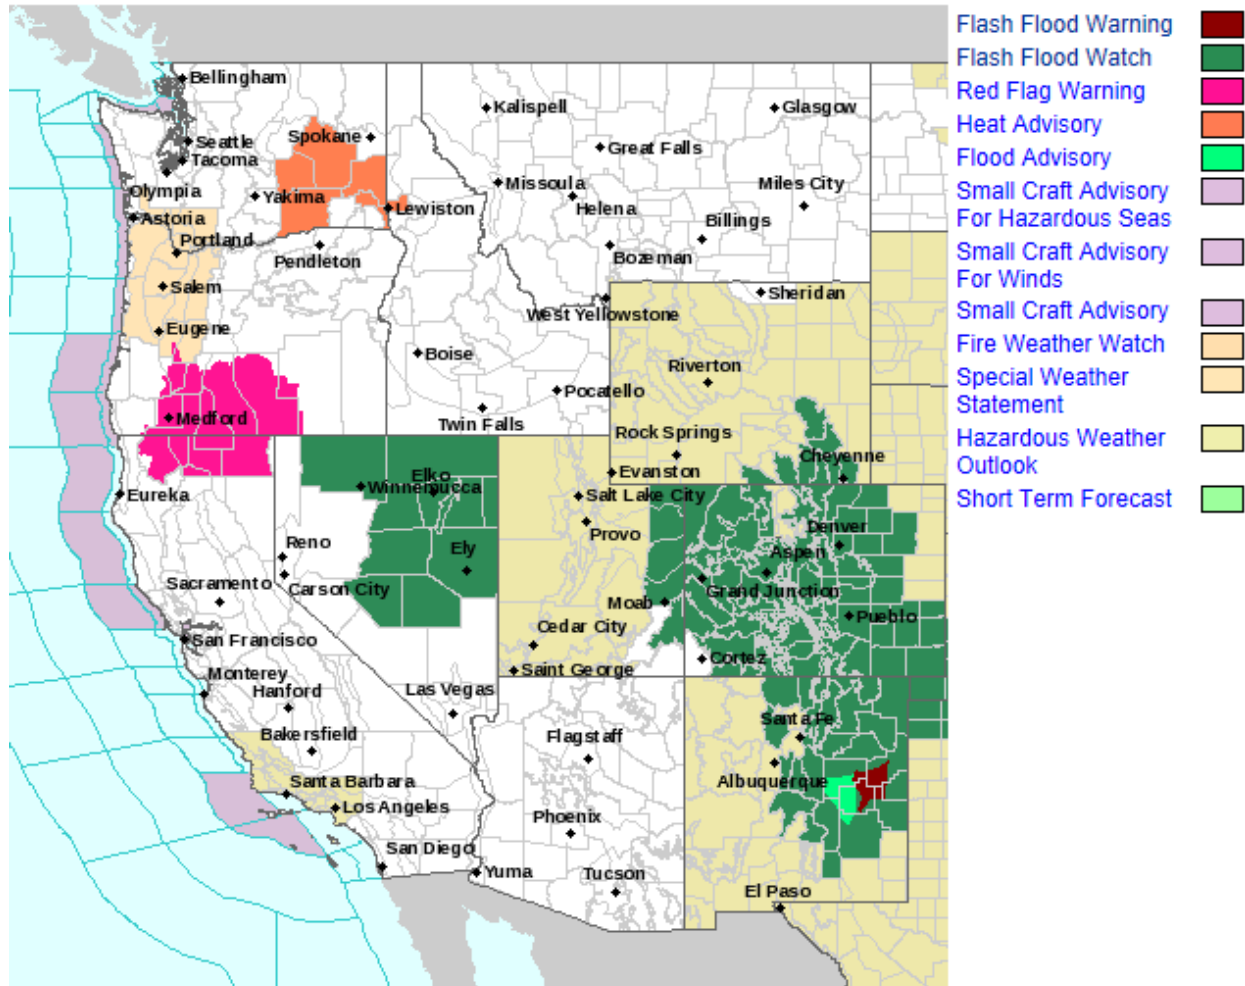

Drying of the monsoonal moisture that brought thunderstorms the past few days is underway but the remaining moisture might be sufficient for a few thunderstorms near the mountains this afternoon. Drier weather will then prevail for much of the rest of the week but with some return of monsoonal moisture possible for Friday into the weekend. Slow warming is expected into the weekend followed by slow cooling into early next week. Weak onshore flow and drying of mid and upper level moisture should allow for some return of the marine layer for coastal areas over the next few days.

Southeast California Weather:

Drier air will continue to move into the forecast area today resulting in decreased chances of showers and thunderstorms through Thursday along with increased temperatures. A return to a more typical monsoon regime is expected late in the week into the weekend as showers and thunderstorms are once again expected across the region.

FIRE ACTIVITY

Sand Incident, Vegetation Fire, Amador / El Dorado Counties Cont. (Update)

Road Closures

- Sand Ridge Road
- All roads in Amador County are open

Utilities

- There are 14 residences without power in the Sand Ridge area. The estimated time for restoration is unknown, as PG&E will need to replace the power poles.

Critical Infrastructure

- El Dorado Irrigation District (EID) has a small diversion dam and pump located on the middle fork of the Cosumnes River off of River Mist Lane and Outtingdale Road. This pump is utilized to pump water out of the River to a water treatment plant. The treated water is then pumped to two storage tanks totaling 150,000 gallons. The storage tanks provide water to 191 connections in the Outtingdale area. EID is estimating the replacement cost of this infrastructure at \$2.5 million and currently preparing an emergency plan in the event that the fire damages any of their pumping infrastructure or if there is an extended power outage.
- Two public safety radio towers are threatened by the fire and an initial estimated replacement cost of this infrastructure is \$650,000.

Health/Medical

- The California Department of Public Health (CDPH), Division of Licensing and Certification (L&C) advises there are currently no licensed health care facilities affected by the fire and will continue to monitor the incident for impacts.
- CDPH continues to monitor the incident for impacts.

Air Quality

- There are no Air Quality Alerts in effect due to the fire.
- The Air Quality Forecast indicates the "Unhealthy for Sensitive Groups" designation will continue through Tuesday, 7/29.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce out door urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.

http://www.waterboards.ca.gov/publications_forms/publications/factsheets/docs/emergregsurban_fs072214.pdf

- Current Reservoir Levels continue to decline. As of July 28, the levels are: Don Pedro 45%; Exchequer 22%; Folsom Lake 43%; Lake Oroville 37%; Millerton Lake 54%; New Melones 27%; Pine Flat 18%; San Luis 24%; Lake Shasta 36%; and Trinity Lake 37%.

Situational Summary

- On July 15, 2014, CDFA in partnership with U.C. Davis Center for Watershed Sciences released a study titled Economic Analysis of the 2014 Drought for California Agriculture. The study indicates the drought in California is the third most severe on record and is responsible for the greatest water loss ever seen for the state's agriculture, and river water for Central Valley farms has been reduced by roughly one-third, according. Direct costs to agriculture total about \$1.5 billion (which include revenue losses of \$1 billion and \$0.5 billion in additional pumping costs). This net revenue loss is about 3% of the state's total agricultural value

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
- The DWR has released a list of unmonitored high and medium priority groundwater basins. As outlined in California's Water Code, some counties and groundwater management agencies in unmonitored basins may be ineligible for water grants and loans administered by the state.
